

Edit the `css/style2.css` file to change the style of your website

The image shows a screenshot of a website with several CSS annotations and callouts. The website content includes a header with the text "JLORD" in a blue box, a main body of text, and a footer with social media links. The CSS code is shown in three separate boxes with arrows pointing to the corresponding elements on the page.

```
{text-decoration: none; color: #333; border-bottom: 3px solid #0068FF;}
hover {color: #0068FF}
{font-weight: 200; font-size: 20px;}

background: #ffded1; /* Old browsers */

```

Find and replace #0068FF to change the colors of the links, heading and heading border. To find more colors, try www.color-hex.com

To change the background color, get rid of the gradient (this give the page the split, 2-tone effect). Then, add a new color to background. If you want to play with the gradient, try a background generator: www.colorzilla.com/gradient-editor

To change the footer from vertical to horizontal, delete the last line for the footer
